Product number: 250006 - 10 pcs. BlackLine 10 POE Touch, Meeting and Conference screen

## A COMPLETE SOLUTION

Our extremely competitive Meeting Room Packages consist of VisioSign software, bundled together with our sophisticated BlackLine 10 POE Touch screens. This range is fully integrated with Exchange, creating an efficient meeting room solution and offers a vast range of exciting features.

VisioSign meeting room solutions are widely utilised by both Danish and other international companies, including countless government agencies throughout Europe. We are proud to be regarded as one of the most user-friendly and reliable systems on the market.

## Our meeting room package includes:

- The Black Line 10 POE Touch meeting room screen (available with 1 piece, 5pcs. or 10 pcs.)
- Ready-made templates, with the possibility of incorporating your own logo and colors
- Template design setup on the screen, with the added capability of extracting meeting data
- The VisioSign Exchange Module

## BLACKLINE 10 POE TOUCH

This elegant meeting room screen boasts the clean forms and straight lines that epitomize classic Scandinavian design. We place a great deal of emphasis on the ease of use, maintenance, installation and servicing of this product, and with the innovative Power over Ethernet (PoE) screen, the cost of installation is kept to an absolute minimum. As an added bonus, this impressive screen can be mounted on any solid surface, including glass. With all of these features combined, we are confident that this is a fantastic product for conference and meeting room display purposes. This screen is part of the BlackLine product range, including information kiosks and large-size screens that all equally possess a timeless style and remarkable quality.

## READY-MADE TEMPLATES WITH YOUR OWN LOGO AND COLORS

Our template designs for meeting rooms include everything from the venue name, time and date to information about individual meetings, such as the start and end time, meeting title and, if necessary, the meeting description. These screens can be placed in front of each meeting room or classroom in order to provide an overview of daily schedules. The touch-screen function also enables the user to add further layers of information, such as details of the next meeting, or the availability of meeting rooms.

## VISIOSIGN EXCHANGE MODULE

The automatic extraction of data from the Outlook section in your Exchange solution allows information regarding your meetings to be displayed on the screens, and is an integral part of VisioSign's Cloud solution.

## OPTIONS

- Meeting room screens are available in own RAL colors, matt or glossy and with your logo printed on the front
- The ability to book a room directly, using the meeting room screen.
